# CAULIFLOWER

NOTE—There is no reason why the *very best* Cauliflower seed cannot be sold at much lower prices than is charged by most seedsmen. They charge high prices because growers think if they pay \$4.00 an ounce for seed it must be better than the seed that costs \$2.00 or less. As a matter of fact the same seed that gardeners pay \$4.00 per ounce for can be sold at \$2.00 and still leave a fair profit to the dealer. The seed we offer is the *very best* that can be procured at any price.

## POTATOES

Our seed potatoes are grown on our own and neighboring farms from seed furnished by us and we think they are far superior to most of the potatoes sold for seed. They are pure, true to name and practically free from scab and other diseases.

The prices here quoted are what the potatoes are worth at the present time (December). We shall endeavor to abide by these prices during the season but should conditions of the market change materially one way or the other we reserve the right to cancel these prices without notice.

Please write us for price on the varieties and quantities you will need if you will require 3 bbls. or more. We will quote the lowest possible prices at all times.

We have the largest and finest stock of choice seed potatoes we ever put in our cellars.

**About shipping.** The potatoes are shipped in barrels or sacks holding 165 lbs. We can usually ship safely by the middle of March but not before, except to the Southern States. If seeds and potatoes are ordered please state on the order whether the seeds are to be held to go with the potatoes, or to be sent at once, and the potatoes later when it is safe to ship them.

Prices quoted below are for the potatoes put up in heavy sacks holding  $2\frac{3}{4}$  bu. each. If you wish the potatoes shipped in barrels instead of sacks please add 25c to the price quoted for sacks.
